

LEGO Build the Change

Are you creative? Do you care about big issues facing the planet like climate change? Why not enter the Build The Change competition and use your imagination to build something that helps to deal with issues such as drought and desertification, food waste, or sustainable building? You could win £2000 for your school to help fund a green initiative or a Build the Change LEGO kit.

All you have to do is:

1. Choose one of the issues our planet is facing: **drought and desertification, food waste, or sustainable building.**
2. Think of an action or an invention that might solve it in your local area or globally.
3. Draw or sketch your ideas. You might want to carefully label it as well.
4. If you decide to build it, you can use any materials you want (LEGO bricks, recycled materials or even modelling clay).
5. Bring your entry to school by **Friday 3rd May** and give it your teacher. Ms Dziewguc will send a photo of your masterpiece to the LEGO Group.
