

25th September 2026

Dear Parents and Carers,

As part of our 25th anniversary celebrations next year and Greening the Malmesbury Community project, we are inviting families to join us for a special bulb planting afternoon to help us improve biodiversity and create a more wildlife-friendly school environment.

We would love families to help us plant bulbs on Thursday 15th October 3:15–4:00pm in the KS2 Playground. This initiative will provide colour in spring and create valuable resources for early pollinators.

We kindly ask that you bring your own bulbs. We suggest daffodils or bluebells. You do not need to bring any gardening equipment — we will have everything ready for you. All children are very welcome to get involved and plant a bulb themselves!

As Malmesbury Primary School celebrates 25 years of bringing our community together, we hope this planting activity will create a lasting legacy for future children to enjoy. Every bulb planted will contribute to our Greening the Malmesbury Community project and help us create a greener, more biodiverse school environment.

If you are unable to join us on the day, you are still very welcome to donate a bulb! Year 2 will be planting bulbs in the KS1 playground as part of their science learning later in the term, and gardening club will also be planting some bulbs in the school garden, so all donations will be gratefully received and contribute to greening our school environment.

We hope you can join us and help us plant for spring!

Yours faithfully,
Malmesbury Sustainability Team
